                    ==========================================
                    Installation instructions for MikTeX on PC     2006/10/03
                    ==========================================
```

   Please check _first_ the same file name in the "LaTeX2e sources" folder
and _read_ the given instructions, if they exist.

Special feature: run under NT too.
===============

Distribution to install: FrenchPourWin.zip
======================== unzip it, run "install" (bat file) and choose
                         the "a la unix" installation;
                         otherwise run "mikinstall"

Status
======
   MikTeX is known to run correctly with FrenchPro.

General instructions
====================

   Read Bernard's documentation "ALIRE.pdf" and make the installation
"a la unix" by typing/clicking "install" ;
otherwise click on "mikinstall" (thanks to Maurice Lombardi
<Maurice.Lombardi -chez- ujf-grenoble.fr> who helped a lot to be able to
generate automatically mik(un)install.bat).

   Notice that if you have a version of MiKTeX less than V2.5 you must use
mikinstall24.bat and mikuninstall.bat.

   Please, let us know any improvement, if any,
and send a full report to Bernard.
