# Requirements for Semantic Requirements Documents

Michael Kohlhase                      John Doe  
Jacobs University, Bremen          DFKI Bremen  
<http://kwarc.info/kohlhase>      <http://dfki.de/jdoe>

May 7, 2010

- 07.02.08*            – *Version:* 1.0 –            *Contributor:* Michael Kohlhase  
made initiale version 1.0 (empty skeleton file)
- 07.03.08*            – *Version:* 1.1 –            *Contributor:* Michael Kohlhase  
added two requirements
- 12.05.08*            – *Version:* 1.2 –            *Contributor:* Michael Kohlhase  
simplified some formulations
- 17.05.08*            – *Version:* 1.3 –            *Contributor:* Michael Kohlhase  
added third requirement that depends on the first two.

## Certification

- 12.02.08*            – *Version:* 1.1 –            *Certifier:* Michael Kohlhase  
*New State:* **needs work**  
some formulations still unclear, but correct in principle
- 15.05.08*            – *Version:* 1.2 –            *Certifier:* John Doe  
*New State:* **at DFKI**  
may need another requirement.
- 19.02.08*            – *Version:* 1.3 –            *Certifier:* John Doe  
*New State:* **at DFKI**  
certified: this is what DFKI wants.

# 1 Introduction

In this document we show how to use the `reqdoc` package, unfortunately, the requirements themselves are quite phony, since they are only for introductory purposes.

## 2 Some Requirements

**U1:** (Priority: 2) Accept `data` from heterogeneous `data sources`

Note: in particular: `DATA`

**U2:** (Priority: 1) do something with the data to test the reference

Note: not really, this is just a test

**U3:** (Priority: 1) do something with the data to test the reference

Note: not really, this is just a test [from 1,2]

## 3 Requirements as tables

We can also format requirements as tables

#	Prio	Requirement	Notes	Refs
<b>U1</b>	2	Accept <code>data</code> from heterogeneous <code>data sources</code>	in particular: <code>DATA</code>	
<b>U2</b>	1	do something with the data to test the reference do something with the data to test the reference	not really, this is just a test	
<b>U3</b>	1	do something with the data to test the reference	not really, this is just a test	<a href="#">1,2</a>

## 4 Conclusion

See, it was quite simple
