

# Package ‘healthyFlowData’

January 2, 2025

**Type** Package

**Title** Healthy dataset used by the flowMatch package

**Version** 1.45.0

**Date** 2013-10-29

**Author** Ariful Azad

**Maintainer** Ariful Azad <aazad@purdue.edu>

**Description** A healthy dataset with 20 flow cytometry samples used by the flowMatch package.

**License** Artistic-2.0

**biocViews** FlowCytometryData

**Depends** R (>= 2.15.0), flowCore

**Imports** methods

**git\_url** <https://git.bioconductor.org/packages/healthyFlowData>

**git\_branch** devel

**git\_last\_commit** a06821f

**git\_last\_commit\_date** 2024-10-29

**Repository** Bioconductor 3.21

**Date/Publication** 2025-01-02

hd	<i>Healthy donor (HD) dataset</i>
----	-----------------------------------

---

**Description**

This dataset contains 20 samples from four healthy individuals.

**Usage**

```
data(hd)
```

**Format**

A flowSet named `hd.flowSet` containing 20 FC samples. Each sample is represented by a flowFrame.

**Details**

Peripheral blood mononuclear cells (PBMC) were collected from four healthy individuals. Each sample was divided into five replicates and each replicate was stained using labeled antibodies against CD3, CD4, CD8, and CD19 protein markers. Therefore we have total 20 samples from four healthy subjects. Each sample was compensated and transformed in order to stabilize per-channel variance. Each sample is then gated on the forward and side scatter to identify lymphocytes. Hence the samples contain only lymphocyte cells.

This is a part of a larger dataset consisting of 65 samples. Please ask the author if you would like to obtain the complete dataset.
